20+ years of software engineering

Objective

To obtain a responsible and challenging position with a progressive company where my work experience will have valuable application and utilization of my opportunity for advancement.

Strengths

- Exceptional communication and collaboration skills.
- Outstanding technical skill.
- Able to involve, improve or provide any software development processes.
- Familiar with modern high-load solutions.
- Expert in working with various operating systems.
- Professional Internet based software development experience using various Internet technologies.
- Highly skilled in customer service.
- Good deliver output in less time without losing efficiency.

Skills

Tools

Technologies	.NET, J2EE, EJB, COM/DCOM/COM+, OLE/ActiveX, AJAX
OS	MS Windows, Linux (Debian), QNX, FreeBSD, MSDOS, Apple DOS 3.3
DBMS	MySQL, PostgreSQL, MS SQL, SQLite, MS Access, Oracle
Related Software	MS Office, MS Visio, MS Project, SSH, Bash, Kile, soapUI
Development	MS Visual Studio, Netbeans IDE, Eclipse IDE, code reviewer, JIRA, GDB, Borland Delphi
SCM	CVS, SVN, Perforce, git

Programming languages

C/C++	STL, GCC, Boost, wxWidgets, Qt, Win32 API, GDI, WinSock, libxml, MySQL++, gSOAP, CppUnit, OpenSSL
JavaScript	Dart, Polymer, DOM, AJAX, JQuery, ExtJS
Java	Kotlin, JSF, RichFaces
C#	.NET 2.0, WinForms
SQL	MySQL, SQLite, T-SQL
Visual Basic	VBA, MS Word, MS Excel, MS Access, MS Outlook
Markup	HTML5, XHTML, CSS3, XML, XSL
Scripting	BASH, Perl, Lua, Python, Groovy, sed, awk, L ^A T _E X 2 _ε
PHP	Drupal, Joomla, WordPress, DataLife Engine, Xaraya
Exotic	Architecture and assembler MOSTech 6502 (Apple II, etc.)

Practical

- Development system software for *NIX systems
- Development sites (News portals, Internet shops, corporate portals)
- Administration *NIX systems (Apache, Mysql, security, SSH)
- Development terms of reference
- Preparation of technical design

- Development of web-based application, protection
- Migrating static sites to automated management systems (CMS)
- SEO (Search Engine Optimization)
- Development of database applications
- Development of application systems (Windows, Linux)
- Development of automated systems
- Optimizing application code
- Optimization of SQL queries
- The introduction of applications and automated systems
- Administration *NIX systems, optimization

Experience

- May 2015 — **Team Lead**, *BAS Services & Graphics, LLC.*, Saint Petersburg, BASSG is an intelligent building solutions company with more than 15 years of experience with more than 200+ clients. .
 Now Lead small team of innovative product for building automation services (IoT). Progress application from early prototype to market product. Completely built up team development processes including CI. Hiring, reviewing and teaching team.
 - build with team ready to market leading-edge product
- July 2017 — **Team Lead**, *Wargaming.net*, Saint Petersburg, An award-winning online game developer and publisher. One of the leaders in the free-to-play MMO market, the company delivers authentic gaming experiences and services across PC, console and mobile platforms. .
 August 2018 Server and game logic programming, as well as in client-server interaction, working with databases, and passionate about new technologies integration.
 -
- Jan 2014 — **Senior Software Engineer**, *Oracle*, Saint Petersburg, Oracle Corporation is a U.S. based multinational computer technology corporation headquartered in Redwood City, California, United States. The company specializes in developing and marketing computer hardware systems and enterprise software products – particularly its own brands of database management systems. Oracle is the second-largest software maker by revenue, after Microsoft. .
 Jun 2015 As a member of the software engineering division (VM team, GC specialization), I assist in defining and developing software for tasks associated with the developing, debugging or designing of software applications or operating systems. Provide technical leadership to other software developers. Specify, design and implement modest changes to existing software architecture to meet changing needs.
 - analyze test results, automate processes and write code to test code for JVM.
 - writing robust, reliable, repeatable and maintainable tests that find issues early and cover the area of the code under testing JVM.
 - build frameworks and tools used for testing JVM.
- Sep 2013 — **Lead Software Engineer**, *Tensor*, Saint Petersburg, Large holding, developing software to automate the management of the company, tax accounting and reporting..
 Dec 2013 Porting large scale application back-end to Linux. Developing international support in back-end. Testing and supporting back-end application.
- Mar 2012 — **Lead Software Engineer**, *Embria*, Saint Petersburg, Internet companies group.
 May 2013 Working on high-load backend solutions (C++, FreeBSD) for social networking service, developing replication subsystem between highloaded servers. Developing and supporting set of internal tools for testing, building and supporting entire project. Research standart PHP modules for performance issues and developing optimized solutions. Recruit and supervise computer engineers and programmers. Coaching colleagues about efficient use of set of IT technologies.
 - Improved building process for entire project (cmake)
 - Developed replica library for embed into different servers
 - Introduce continious integration process for entire project

- Sep 2010 — **Senior Software Engineer**, *Sperasoft Inc.*, Saint Petersburg, International outsourcing company.
- Mar 2012 Customer: BioWare
Working on high-load game site (Drupal, Apache Solr), integration with 3rd party search engine, developing game data import flow from various data sources. Developing and supporting set of internal tools for testing, inviting, monitoring, etc. Consulting, prototyping and developing corporate internet sites. Plan, control and evaluate the operations of information systems. Recruit and supervise computer engineers and programmers.
- Actively participated in SWTOR game launch
 - Optimized UI responsibility of servers monitoring internal system
 - Finalized and introduced integration modules of high-load site data with Apache Solr search engine
- May 2010 — **Senior Software Engineer**, *Sperasoft Inc.*, Volgograd branch, International outsourcing company.
Automate, optimize and promote corporate sites. Plan, control and evaluate the operations of information systems.
- Sep 2010 Recruit and supervise computer engineers and programmers.
- Convert static corporate site into dynamic full-featured extensible site on CMS Drupal
- Jul 2008 — **Senior Software Engineer**, *Sperasoft Inc.*, Volgograd branch, International outsourcing company.
- May 2010 Customer: Sony Online Entertainment
Worked as member of a team developing and maintaining: distributed high-load system of data collection and metric controls of company systems. Develop and implement policies and procedures for electronic data processing and computer systems operations and development. Meet with clients to discuss system requirements, specifications, costs and time lines.
- Improved speed of SOAP data exchange between web application and server
 - Implemented fault tolerance subsystem
 - Optimized project building under Linux
 - Develop deployment, configuration and handling script (bash) of software instances
- Aug 2007 — **Freelancer**, Volgograd.
- Jul 2008 Meet with clients to discuss system requirements, specifications, costs and time lines. Development, implementation, optimization and modernization of web-projects. Implementation of custom modules and themes for Drupal (node files local task tab). Implementing sites based on Drupal modules: Content Construction Kit, Views, Pathauto, Nodewords, Taxonomy breadcrumb, MultiLink, Location, GClassified Ads, Video Filter, Custom Pagers, Image, Boost, Locale, Profile, Actions, IMCE, Workflow, Ubercart, Slideshow, TinyMCE and so on. Customizing and code tweaking: Image, Taxonomy menu, Drush, Imagefield Crop. Development and implementation of web-projects (<http://vaultsoft.ru/portfolio>).
- May 2006 — **Software Engineer**, *OOO "Greentek"*, Volgograd.
Development of the accounting system of orders and sales, support multiple sales sites (decanat.com), the development of web shops (sverka). Control the budget and expenditures of the projects. Develop and implement policies and procedures for electronic data processing and computer systems operations and development.
- Aug 2007
- Implemented web system to workflow orders and sales of company
 - Implemented distributed system of company internet shops
- Feb 2006 — **Lead Programmer**, *"Creative Volga"*, Volgograd, web-studio.
- Apr 2006 Meet with clients to discuss sites requirements, specifications, costs and timelines. Control the budget and expenditures of the projects. Planned, created, launched, and managed web-site <http://vaultsoft.ru/portfolio/creative-volga> .
- Aug 2003 — **Software Engineer**, *OAo "Volgograd State Tractor Plant"*, Volgograd, Computing systems lab.
- Nov 2005 Implemented major improvements in automation of administrative and operational procedures for the company email service. Administration and refinement of instant messaging ichatsrvd . Wrote set of scripts for internal web resources (Visitlog , EasyNPengine).
- Implemented system to automate paper work of department
 - Improved and applied a system of instant messaging in the enterprise

Languages

Russian Mother tongue
English Spoken and written

Technical — fine

Education

2003 — **Master's Degree in Computer Science**, *Volgograd State Technical University*, Volgograd, *GPA of 3,6*
2009 *on a 4.0 scale.*
Automated systems for information processing and management

Programs and scripts

- Yet another WebGL small demo: Mandelbrot&Julia-on-shaders
-

Winamp Statistician (VC++) Plugin for Winamp collected statistics about played tracks and then shows top list.

VaultSoft (PHP, MySQL) Control System news, polls, banners and counters on the site on the templates and database.

EasyNP Engine

RemoteProcMon (C#) server-client application, monitor the state of *NIX systems.

Admin traffer (C#) Counts squid-traffic.

VSMessenger (VC++) instant messaging client based on intranet chat.

wxChatAdmin (VC++, C#) remote administration tool for instant messaging server.
